

Out of prolonged exposure to hydro & thermal Power generation field, we manufacture

AC HV test equipment : for large hydro stators (11 meter bore, 3 meters cone height)

THDC - for 4 x 250 MW)

We have manufactured H.V test kits up to 100 KV

Flux test equipment :

After building large stators the cone assembly is tested before winding by magnetizing it with torrential winding.

We manufacture and supply the complete set ups required for this test.

We have manufactured equipments for hydro status up to 300 MW.
